EDUCATION

Korea Advanced Institute for Science & Technology (KAIST)

September 2025 - Present

Ph.D. in Statistics

Daejeon, South Korea

- **Relevant Coursework:** Business Intelligence, Programming for AI, Reinforcement Learning, Programming for Data Science, Optimization for AI, Data-Driven Decision Making
- **Research Project:** Built a Bayesian transfer learning pipeline that adaptively weights multiple pretrained models using Bayesian Model Averaging, improving parameter estimation in sparse high-dimensional regression tasks.

University of Toronto

June 2024

Master of Science in Statistics (Grade: 1.4)

Toronto, Canada

- **Relevant Coursework:** Statistical Modeling and Validation, Reinforcement Learning, Machine Learning, Neural Networks, Regression, Bayesian Methods, Time Series, Mathematical Finance

University of Heidelberg

April 2023

Bachelor of Science in Mathematics (Grade: 1.8)

Heidelberg, Germany

- **Relevant Coursework:** Linear Algebra, Analysis, Probability Theory, Deep Learning, Algorithms and Data Structures, Databases, Graphical Theory, Functional Data Analysis

EXPERIENCE

AI Engineer

August 2024 – August 2025

Elektroform GmbH & Co. KG

Norderstedt, Germany

- Engineered an autonomous multi-agent system using CrewAI and OpenAI LLMs to automate B2B customer acquisition, identifying and qualifying 10-15 high-potential clients weekly, reducing manual research time by 75%.
- Integrated diverse AI tools and data sources, including web scraping (Selenium), search APIs (Serper, Exa), and RAG knowledge retrieval from technical documents
- Developed an AI-powered outreach module that automatically extracts contact information and crafts personalized email drafts highlighting the companies's unique value proposition, streamlining the initial sales outreach process via automated SMTP delivery.

Data Analyst

Jul 2021 – Mar 2023

University of Heidelberg

Heidelberg, Germany

- Monitored and maintained database of over 10,000 library records at the faculty of mathematics
- Collected and analyzed Covid-policy-related data, directly impacting the adjustment of critical Covid regulations
- Developed insightful R visualizations and trend analyses to support data-driven decision-making on Covid policy adjustments

PROJECTS

Retrieval Augmented Generation (RAG) Chatbot

- Developed AI chatbot application in Python using large language model from Meta and Groq API
- Utilized NLP libraries to create a vector database for storing documents
- Dynamically leverages over 10 documents to enhance query responses and decision-making accuracy

Predicting Developments of Renewable Energy Production in the Foreseeable Future

- Developed autoregressive time series forecasts enhanced with Bayesian methods to model global renewable energy trends
- Projected a 5% increase in renewable energy production by 2027 in Western nations, while forecasting a 5–10% decline in rapidly developing economies like China and India

SKILLS

Programming Languages: Python, R, SQL, Stan, C++, C#

AI/ML Frameworks & Libraries: Scikit-learn, PyTorch, Tensorflow, Langchain, CrewAI

Data Science: PowerBI, SciPy, NumPy, Pandas, Matplotlib, Ggplot2, Tidymverse

Languages: English (fluent), German (fluent), Mandarin (B2), French (B1), Korean (A2)
